

# Fur Elise Beginner's Kit

Ellie Hallett

Practise these with relaxed hands. Don't be afraid to swivel on the thumb in system 4. For octaves one after the other as in system 6, maintain your open spread-out octave-shaped hand and fingers in the air as you travel from one octave to the next. Focus on each 5th finger's note so that you are over it before you play it. The octave above will find itself as your hand-span.
